

Encounters with Children: Pediatric Behavior and Development (4th edition)

Suzanne D. Dixon, MD, MPH and Martin T. Stein, MD

Books now available!

Since the publication of the 1st edition in 1987, we have been gratified that *Encounters with Children: Pediatric Behavior and Development* has become a standard text for pediatric residents during their Developmental and Behavioral Pediatric rotation and for DBP fellows. Many have expressed concern that this book (Edition 4) is no longer available. We are happy to report that this volume is now available. *Encounters with Children: Pediatric Behavior and Development* can be ordered “print on demand” format from the publisher (Elsevier). This is a new process in major publishing houses and is the wave of the future. These copies look good to us upon our review.

To order: call the publisher at 800-545-2522, choose option 3. The book will arrive in less than 10 days. The cost is: \$85.95 including shipping. We expect that this process will be seamless. If there is a question about the availability of the book, inform the receptionist that it is “print-on-demand” status.

It is our hope that pediatricians and other pediatric clinicians will continue to find this book to be a valuable resource to gain knowledge and skills in child development, behavioral pediatrics and family dynamics.

Warm regards,

Suzanne D. Dixon, MD, MPH
