

Information regarding earning CME from the 2018 SDBP-NAPNAP symposium web-based content

The presentations were case based and presented by an inter-professional team. The ADHD case study was presented by Developmental and Behavioral Pediatrician Dr. Tanya Froehlich, DBP psychologist Dr. Casey Krueger, and Pediatric Nurse Practitioner Dr. Susan Van Cleve. The autism case study was presented by Developmental and Behavioral Pediatrician Dr. Carolyn Bridgemohan, DBP psychologist Dr. Casey Krueger, and Pediatric Nurse Practitioner Dr. Beth Heuer. The recorded content is hosted on NAPNAP's PedsCE website and is available for NPs and RNs to earn CEU/contact hours. As the CEU/contact hours are through NAPNAP, they are only accredited in providing nursing CEU. All SDBP members are able to access the modules and complete them, but cannot currently earn CME for this.

The 2019 Psychopharmacology Symposium was also recorded and we plan to list these on the PedsCE website as well in the near future.

Here are links to each course and the contact hours earned. All courses are open on the PedsCE website from 4/11/2019 to 4/30/2020.

The following courses are part of case study presentation. They may be taken individually. If you would like to benefit from following the case study, as it unfolds, we recommend that you participate in these courses in the following order.

[Case Study: ADHD – Part 1 - Adolescent](#) – 1 contact hour

[Case Study: ADHD – Part 2 - Adolescent](#) – 0.75 contact hour

[Case Study: ADHD - Part 3: DBP Clinic: Treatment Approaches, Psychopharmacology Treatments](#) – 1 contact hour

The following courses are part of case study presentation. They may be taken individually. If you would like to benefit from following the case study, as it unfolds, we recommend that you participate in these courses in the following order.

[Case Study: Developmental Delay and Autism in a Young Girl](#) – 1 contact hour

[Case Study: Assessment/Diagnosis for Autism](#) 1.5 contact hour

[Case Study: Management and Treatment after ASD Diagnosis](#) – 0.75 contact hour

The coupon code is **SDBPMEM2018**. It will make the cost of the course \$10 for those that are not NAPNAP members. \$10 is equal to the fee for NAPNAP members, so all NAPNAP and SDBP members will pay the same price, \$10. Non members of both organizations will pay the higher fee. It will not reduce the price any lower than the NAPNAP rate if they are already a NAPNAP member. It is only set to work on the 6 courses that we archived, and after the sixth use, the coupon will no longer work for that individual.
